"PTSD and Co-occurring disorders in Fire Fighter Culture: What Clinicians Need to Help the Helpers" has been approved by the NBCC for 6 general hours of NBCC credit. NBCC Approval Number SP-3110.

The Oxford Treatment Center is approved as a provider of social work Continuing Education credits by the Mississippi Board of Examiners for Social Workers and Marriage & Family Therapists for the single program, "PTSD and Co-occurring disorders in Fire Fighter Culture: What Clinicians Need to Help the Helpers." Social workers receive 4.5 general hours and 1.5 cultural competency hours (application #18.61) for full attendance/successful completion in this course.

Oxford Treatment Center is solely responsible for all aspects of the program.

Upon attending the program and completing a provided evaluation, you will gain access to a presentation-quality certificate of completion containing details about the program. This can be used as proof of completion to obtain CE credits / hours.

"
It's the social isolation, combined with self-blame, that puts people at real risk."

Space is limited. Register online at oxfordtreatment.com/blog/helpingtherescuers/.

PTSD and Co-occurring disorders in Fire Fighter Culture: What Clinicians Need to Help the Helpers

This program will cover fireservice culture, the existing evidence regarding incidence and prevalence of mental health conditions in this population and the evidence base regarding treatments that work. Participants will have ample opportunity for skills acquisition and practice, as numerous active learning techniques are applied over the course of the training day.

LEARNING OBJECTIVES
- Review the scientific and clinically based knowledge base regarding fire service culture.
- Present and review the literature regarding evidence-based treatments for PTSD and SUD with pros and cons of each approach interactively debated.
- Discuss the perils and pitfalls as well as success stories from initial clinical meetings with video clips to facilitate discussion. Then, students will engage in role-plays of initial meetings.
- Self-assess whether the participants' organizations and individual practice styles can accommodate emergency responder culture.

ADA ACCOMMODATIONS
If you require special accommodation or support of any kind to attend this event, please contact Brian Whisenant at wwhisenant@contactaac.com.

About Dr. Gulliver

Dr. Gulliver is a licensed clinical psychologist and clinical researcher. Currently, she serves as Director and Chief of the Warriors Research Institute and as a Professor at the Texas A&M Health Science Center.

Dr. Gulliver attended Quinnipiac College for her Bachelor of Science degree in Psychobiology, followed by a Master's degree in Clinical Psychology at Connecticut College. After completing her Ph.D. in Clinical Psychology at the University of Vermont, Dr. Gulliver went on to work as a National Institute of Alcohol Abuse and Alcoholism-funded Postdoctoral Fellow at Brown University and later spent 12 years in a variety of roles at the VA Boston Healthcare System including Associate Director of Outpatient Mental Health Programs.

In 2007, Dr. Gulliver became the Director of the VA VISN 17 Center of Excellence in Waco, Texas before founding the Warriors Research Institute (WRI) within Baylor Scott & White Health in 2013.

Dr. Gulliver's research interests and publications address mental health among military veterans and emergency responders.
